

## ***The Control of Vibration at Work Regulations 2005***

The Control of Vibration at Work Regulations 2005 is a new set of regulations that were introduced in July 2005. This regulation is applicable to employers who employees regularly use:

- Hand-held power tools
- Hand-guided power equipment
- Powered machines which process hand-held materials

These regulations are not applicable to child care and are more related to learners who work on constructions sites and similar related apprenticeships so I am not going to go into any further detail, however information is available at [www.hse.gov.uk](http://www.hse.gov.uk)
